The library hosted five Family Movie Matinee events so far to encourage community engagement and provide wholesome entertainment opportunities for families. The movies shown were suitable for all age groups. We screened The Little Mermaid, and it was delightful to see little girls dressed in mermaid-themed clothes. We also showed Babe and an old classic, which received positive feedback from teens and young ones. To promote literacy, we plan to show a few book-themed movies. Attendees were welcome to bring non-goopy snacks like popcorn to the showing. We received positive feedback from attendees, expressing satisfaction with the library's efforts to create a family-friendly space and an opportunity to do something together.

The outcomes successfully achieved our objectives of community engagement and family entertainment. Attendees provided positive feedback, saying, "Enjoyable for family outing" and "More like this, please."

During the final film as with the teen movies there was an issue of a child not paying attention and disrupting the other viewers which will need to be addressed going forward.
